

From Rough-Cut Cherry To Heirloom

We begin by hand-selecting the finest kiln-dried FAS American Black Cherry. Boards are cut to rough-length and flattened on a jointer, and planed, ripped, and cut to size.

Each furniture piece is made one-at-a-time. Our table tops are glued up from the same plank of cherry to ensure that the wood matches in both grain and color.

All tables are constructed with double-pinned mortise and tenon construction. Each tenon is glued and secured in-place with two hand-planed Black Walnut pegs.

There is an unsurpassed attention to design and detail that is just not found today. Our finishes are hand-rubbed using a mixture of Tung and Teak Oils that provide a trouble-free finish that not only gives our furniture a silky-smooth look and feel, but will also last for generations to come.

Each piece is signed, numbered, dated, and branded with our hallmark

All drawers and Shaker Steps are hand-dovetailed using only hand chisels and Japanese Dozuki Saws.
